

Multiplying Disciples – Puzzle (Older Elementary)

Jesus chose 12 disciples to spread his message of God's love to the world. But how could just 12 people reach the whole world?

Think about this. What if those 12 people found 12 new disciples? Now how many disciples would there be?

$$12 \times 12 =$$

Now what if those disciples found 12 new disciples? Take the answer from above and multiply it by 12. Use a calculator if you wish.

$$\times 12 =$$

Let's keep going! Take that answer and multiply by 12. Continue in this way to find out how many disciples could be made in a fairly short time.

$$\times 12 =$$

$$\times 12 =$$

$$\times 12 =$$

Number of disciples:
